### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over LaVite, US #6,197,390 in view of Fink et al. US #5,340,350.

3. LaVite teaches a figure having an attachment at one end for connection to a trailer hitch (column 2 lines 35-50). LaVite does not teach the figure as specifically being an artificial hand, however, such figures are well known in the art. Fink et al. teach an artificial figure having flexible wire inserts, such as insert 40 in Figure 2. The device is made of soft plastic and the wire inserts are stiff yet bendable.

4. It would have been obvious to a person having ordinary skill in the art to utilize a body part, such as a hand, as shown in Fink et al. as the "select figurine" in LaVite (column 2 lines 38-39) so that a personalized display may be constructed. La Vite also teaches the figurine as being human (column 3 line 19).

5. LaVite and Fink et al. do not specifically teach metal wire or a silicone rubber-based compound, however these materials are well known in the art. It would have been obvious to one of ordinary skill in the art to use these materials since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of design choice.
